Extraordinary Performance and Value:
Modero S-Series Control Panels from AMX

At the core of the AMX meeting experience is the control panel, the user interface that gives you the ability to control the entire meeting space at the press of an icon. With an amazing set of features and AMX's legendary design, Modero S series control panels are the ideal solution for those who want a great looking, economical panel that's not skimpy on features.

The Modero S-Series comes in a wide variety of sizes and configurations to meet the needs of any conference room, boardroom, classroom or auditorium. Each model is packed with valuable capabilities including:

- **Sleek Industrial Design** – the styling is complementary to the Modero X-Series, so you can use Modero S and Modero X and maintain a consistent look throughout the installation
- **Amazing Versatility** – the S-Series is perfect as a table top control panel for room control, or as a scheduling panel you can mount outside the room on the wall or glass.
- **Elegant Room Availability Indicator Bars** – easily glance down the hall to see if meeting spaces are occupied. Lights on each side of the panel show red when occupied, green when vacant.
- **SmoothTouch™ Display** – unique AMX design provides an elegant and responsive user experience that supports single-touch gesturing
- **Generous, Secure Mounting Options** – mount your Modero S panel anywhere while discouraging theft. Options include glass / multi-surface mount, single or double gang box mount and secured lectern / table mount.

From the most technically sophisticated conference room to the smallest Huddle Space, AMX has the right Modero S Series control panel to make your meeting perfect.
